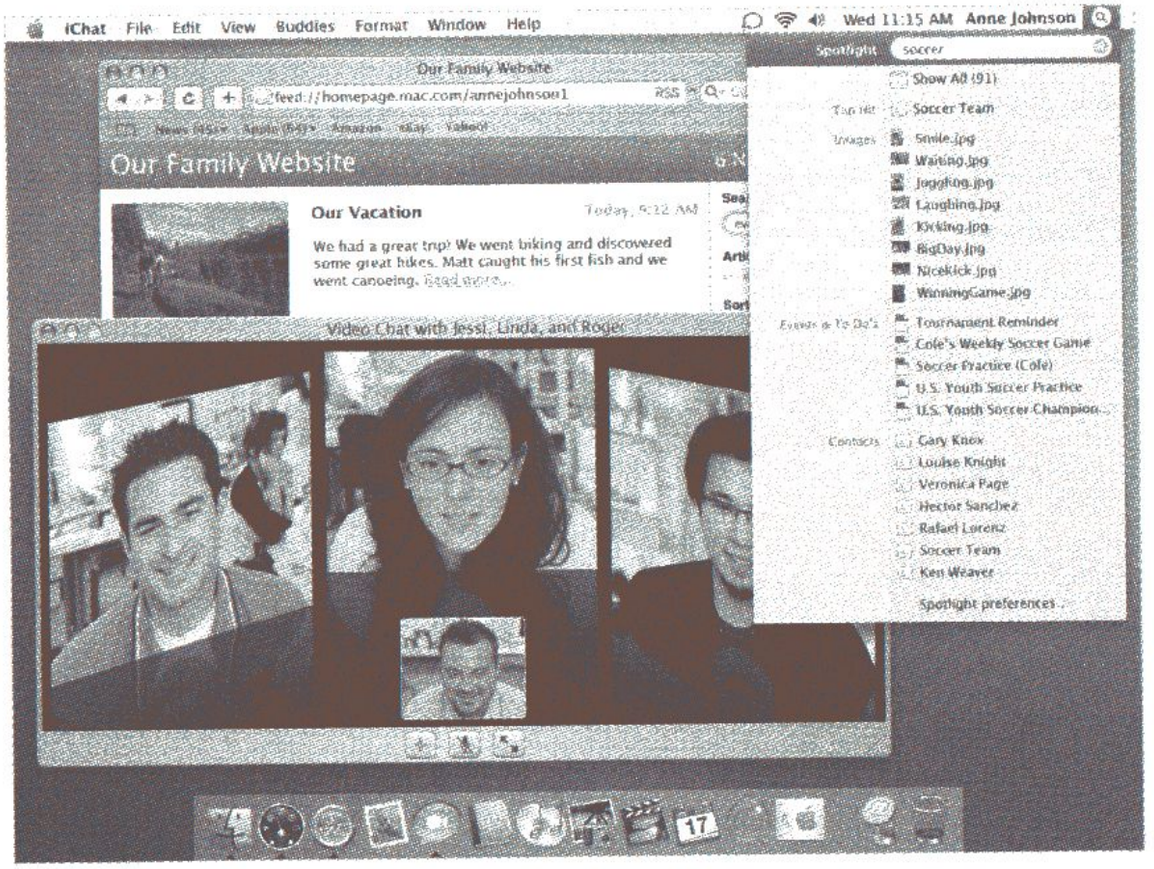
Welcome to Tiger

Mac OS X v10.4

Welcome to Tiger

Mac OS X puts power at your fingertips with Spotlight searching, Dashboard widgets, custom web news, and four-way video conferencing.

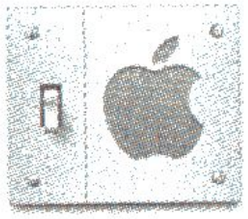


Spotlight

Find anything, anywhere on your computer as quickly as you can type. Search your entire system from anywhere to find documents, email, contacts, calendars, music, movies, photos, bookmarks, and applications.

Finder

You'll find Spotlight throughout Mac OS X Tiger, including in the Finder. To find files on your hard disk, type a few letters or words in the search field. In the Finder you can create a Smart Folder that updates its contents automatically each time you open it.



System Preferences

You can use Spotlight to find anything, including settings you want to change in System Preferences. To do so, open System Preferences and type a few letters or words in the search field. Spotlight even understands Windows terms.

Address Book

Address Book provides several ways to organize and find contacts. Use Spotlight searching to locate any person in your address book. Create a Smart Group to find contacts automatically based on information in your Address Book cards.

Dashboard

Dashboard zooms onto your desktop with the click of a mouse and, like Exposé, disappears just as quickly. You can use widgets to get up-to-date information, quickly look up contacts, check your stock portfolio, see what's playing on iTunes, and more.

iChat AV

Use multiway video and audio conferencing to chat live with friends and colleagues. Video conference with up to three other people with stunning, true-to-life pictures and crystal-clear conversation.

Safari RSS

Now Safari brings you up-to-the-minute RSS news, headlines, and summaries from the web. Scan thousands of articles in one easy-to-read, searchable list. Then bookmark your search to quickly find similar articles in the future.

Mail

Take control of your inbox. With Spotlight searching, find messages instantly and organize them using Smart Mailboxes. Slideshows make it easy to view images you receive in messages and then save them directly to your iPhoto library.

iCal

iCal makes it easy to organize and share your calendars with others. You can invite guests to events by sending them an invitation email, then tracking their replies. Calendar groups help you organize your meetings and events. Spotlight searching lets you find any event even in the busiest schedule.

.Mac Sync

.Mac sync* makes it simple to keep your information synchronized on several Mac computers. You can synchronize bookmarks, calendards, contacts, and more so that you always have current information available.

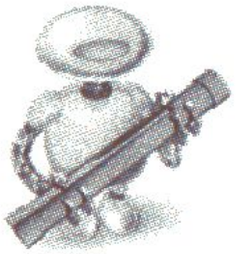
* To use .Mac syncing, you need a .Mac membership.

QuickTime 7

The new H.264 codec in QuickTime 7 delivers crystal-clear video and smooth playback even when you change the size of the player window. Upgrade to QuickTime 7 Pro to capture movies and share them with your friends.

Works With Windows

Your Mac fits seamlessly into Windows networks so that you can share documents and printers with everyone. You can establish a secure connection to a Windows network over the Internet and access Microsoft Exchange servers.



Automator

Automator lets you automate the tasks you do most often. It's simple to create Automator "workflows" by dragging "actions" and selecting options. Then share your workflows in several convenient formats.

Parental Controls

You can create a user account for each person using your Mac and select appropriate privileges for each one. You have complete control of your children's access to your computer, the Internet, and who they communicate with.

iTunes

iTunes makes it easy to organize, share, and listen to your music. Shop for music on the iTunes Music Store*. Create playlists of your favorite songs, then copy them to your iPod. Or burn CDs to share your music with your friends.

* The iTunes Music Store may not be available in your country.

iLife

iLife applications* work together to help you unleash your creativity. Create photo albums and slideshows, make your own high-definition digital videos, compose your own music, then author DVDs to share your creations with others.

* iLife applications are not included with Mac OS X, but may be installed on your computer. Some iPhoto services may not be available in your country. To use some iPhoto services, you need a .Mac membership. To burn a DVD, your computer must have a SuperDrive.
